

Please do not allow the phone companies to monopolize Internet Access through DSL lines here in Arizona. Again and again Qwest has chosen to NOT offer this service to rural Arizona, has continued to only ben interested in servicing urban areas of our state (which there are very few). Meanwhile the local Internet Providers have reached out to rurual Arizona (AMERICA) and at their own expense NOT left us out of the electronic age. Do not take away their ability to continue to do so, again without them and the smaller DSL providers we would have no high speed options at all (both Qwest and Cox have told me that they will not offer business class high speed access in the rural town in which I abide.

Thank you for allowing me to speak on this subject.
